Art Unit: 1618

Claims 1-27 are presented for examination.

The amendments and remarks filed on October 19, 2006 have been received and entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-14 and 18-27 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for zinc, anti-angiogenic agents and anti-cancer agents, does not reasonably provide enablement for all compounds being different than tetraalkylammonium tetrathiomolybdate compound. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The factors to be considered whether a disclosure meets the enablement requirements of 35 U.S.C. 112, first paragraph, have been described in *In re Wands*, 8 USPQ2d 1400 (Fed. Cir.1988). Among these factors are:

- 1) The nature of the invention:
- 2) The state of the prior art:
- 3) The relative skill of those in the art:
- 4) The predictability or unpredictability of the art:

The unpredictability of pharmaceutical and chemical art is high.

- 5) The breadth of the claims:

The claims are very broad and encompass a composition of tetraalkylammonium tetrathiomolybdate and any agent that is different from tetraalkylammonium tetrathiomolybdate compound.

6) The amount of direction or guidance provided:

Applicant's specification provides guidance for and it is only enabled for adding angiogenic and anti-cancer agents to tetraalkylammonium tetrathiomolybdate. In *re Dreshfield*, 110 F.2d 235, 45 USPQ 36 (CCPA 1940), gives this general rule: "It is well settled that in cases involving chemicals and chemical compounds, which differ radically in their properties it must appear in applicant's specification either by the enumeration of a sufficient number of the members of the group or by other appropriate language, that the chemicals and chemical combinations included in the claims are capable of accomplishing the desired results."

7) The presence or absence of working examples;

The examples in applicant's specification are drawn to the combination of tetraalkylammonium tetrathiomolybdate and zinc and a few anti-cancer drugs.

8) The quantity of experimentation necessary;

Since compound structure and activity for such pharmaceutical use must be determined from case to case by painstaking experimental study, one of ordinary skill in the art would be burdened with undue experimentation to obtain all pharmaceutical compositions by adding an agent to tetraalkylammonium tetrathiomolybdate.

Applicant's amendments necessitate the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
